

SIMPLY PURE

**WATERLOGIC**<sup>®</sup>  
INTERNATIONAL

AND *BioCote*<sup>®</sup>

NATURAL  
ANTIMICROBIAL  
SOLUTION  
IN WATERLOGIC  
POINT-OF-USE  
COMPONENTS.

Bacteria are a fact of life, however in hygiene conscious environments it is important to manage and control these levels and reduce them to a minimum.

**Waterlogic** are proud to introduce the addition of **BioCote**<sup>®</sup> anti microbial as a second line of protection to their products. **BioCote**<sup>®</sup> protection is **WRAS approved**, and will be added to all plastic parts that surround dispensing areas thereby upgrading its hygienic protection level to the best in the market place. **Waterlogic units already equipped with in-tank UV systems, with the addition of BioCote**<sup>®</sup> protection will continue to guarantee the highest level of hygiene to its customers.

**BioCote<sup>®</sup> is a unique anti-microbial solution that inhibits the growth of micro-organisms based upon silver technology.**

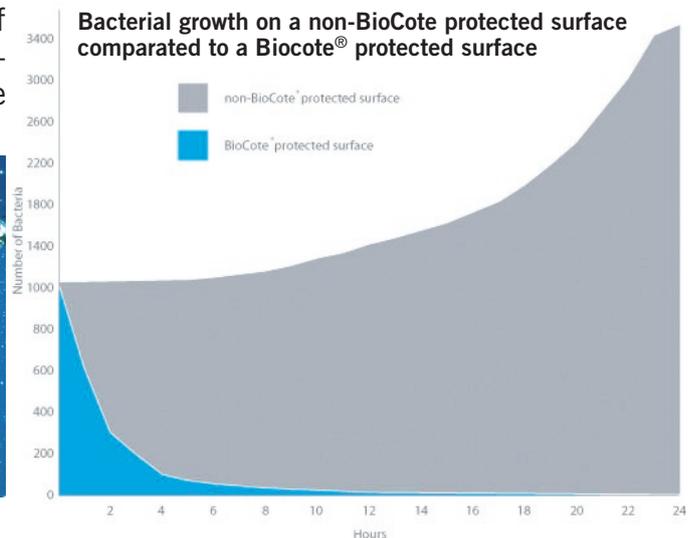

The silver ions are added to materials at the manufacturing stage. This results in an active concentration of silver ions on the surface of the product. The silver ions cause functions in the bacteria to break down. This results in the bacteria being unable to reproduce and therefore inhibits bacterial growth.

You can see from the illustration below of the potential benefits of a BioCote<sup>®</sup> protected surface compared to a non-BioCote

protected surface. Bacteria usually reach a products surface via hand cross-contamination. On a BioCote<sup>®</sup> protected surface that is contaminated, levels of bacteria will gradually reduce over a period of time.

The illustration shows that if the same levels of bacteria were found on a non-BioCote protected surface then over the same period of time bacteria will proliferate and the levels could reach very dangerous levels.

**THIS TECHNOLOGY HAS BEEN ADOPTED BY THE FOLLOWING COMPANIES AND PRODUCT RANGE:**

- Allgood - Architectural Ironmongery
- Apreco - Air pressure stabilization systems
- Burgess - Ceilings
- Barloworld Scientific - Laboratory equipment
- CFM - Notile wall panels
- Comark - Food thermometers and data loggers
- Contour Casings - Radiator covers
- Crabtree - plug sockets and switches
- DEB - Soap dispensers
- Environmental Hygiene - Clinical Bins
- ESL - Patient "case note" folders and binding clips
- Euro Packaging - disposable aprons and bin liner sacks
- Extile - Exit panels
- Fetim - Shelving brackets
- Hospital Direct - Patient handling devices
- Ingersoll Rand - Hand recognition security systems
- James Cropper - Patient "case note" paper

- Kohler Mira - Taps
- Link 51 - shelving
- Link Lockers - Lockers
- Malvestio - Hospital bed (Italian market exclusive)
- Modulex - signs and way-finding systems
- Mosaic - Cubicle curtains
- Mountway - Bath lifts for the disabled
- Pall Medical - Water filters
- Pressalit ESL - disabled bathrooms
- Prioclave - Autoclaves
- SKOPOS - curtains and fabrics for the leisure industry - hotels etc
- Static Systems - Nurse Call Systems and trunking
- Sidhil - Hospital Beds (UK market exclusive)
- Silent Gliss - Cubicle curtain tracks
- TDSL - doors
- Timbmet Silverman - door frames, wall rails and skirting
- Vertika - Blinds
- Wardroom - Nurse areas and kitchens
- Warwick SASCo - bedpans and urinals
